

REPAIR A TEAR by DAZZLE IMAGE CONSULTING

Step 1

This is for a tear on inner leg of pants. Turn inside out, lay flat. Use these steps for any tear.

Step 2

Create a fold in the fabric and pin. Use matching thread.

Step 3

Thread needle. Tie knot at ends of cotton. Start at one end of the tear. Place needle into fabric fold.

Step 4

Put needle in and out of fabric to create a line of stitching. Position a small distance from tear edges.

Step 5

Sew the line of stitching to the end of the tear towards the fold of the fabric.

Step 6

Stitch back the way you came and fill in the spaces between the stitches.

Step 7

Sew the last few stitches, towards the fold, to create no gaps. Cut thread with enough to tie knots.

Step 8

Turn garment to the correct way. You may need to iron flat.
